

Heatmap showing Pose error (in degrees) on the Y-axis (0 to 180) versus Training Data Split on the X-axis (0.1 to 0.9). The color scale represents the error magnitude, ranging from 10^0 (dark purple) to 10^3 (yellow). The plot shows a diagonal band of low error (dark purple) and a region of high error (yellow) at the bottom left.
